# 06. MODE OF LEARNING

## MODE OF LEARNING

## SELF-DIRECTED LEARNING

The G-ELT is a programme that enables self-directed learning. Extensive learning contents are prepared for the learner. A LMS tracks progress and identifies weaknesses.

- ✓ Every lesson comes with an instructional video that teaches and engages the learner.

- ✓ Every theme teaches its own specific set of new vocabulary and phrases to the learner.

- ✓ Every lesson applies the new vocabulary in conversations, using the right grammar and sentence structure.

- ✓ Every lesson provides speaking practices that enable learners to speak accurately in their own time.

## ENABLING TECHNOLOGIES

The G-ELT software comes with several technologies that enable effective self-directed learning.

- ✓ A Learning Management System (LMS) tracks each learner's progress and identifies weak areas.

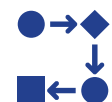

- ✓ Speech recognition technology analyses speaking practices and corrects them automatically.

- ✓ Learning guides enable learners to navigate the contents easily.

- ✓ Voiced mother language support, including Bahasa Malaysia and Mandarin, helps learners to understand teachings, especially for beginners.

- ✓ Job-based e-coursebooks guides the learner through the modules & themes.
